

To The Parents of Christ The King Early Childhood Center;

Michigan state law requires that we inform our parents of when any pesticide company will be in the building and maybe spraying the outside for any pests.

Christ The King Early Childhood Center uses Terminex Company for pest control. They come out periodically throughout the year to deal with ants, bees, etc- and they also come out to do site checks. You will be informed verbally on the day that Terminex will be at the center and also there will be a note posted by the sign in/out sheet letting you know as well.

No pesticides are sprayed in the building while the children are present. Terminex currently comes out on Friday evenings- so the spray has time to dissipate over the weekend.

If you have any questions please contact the office at 734-285-8525.

Thank you

Kristi Maynard
